DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-4, 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (figures 8-13).

Regarding claims 1-4, 7 and 9, the admitted prior art teaches an electro-acoustic transducer that comprises a magnetic circuit (1, 2, 3, 4), a frame (6), a diaphragm (7), a voice coil (8), a terminal (10) consisting of a sheet metal having spring property and electrical conductivity, and a stopper (9, 11). As shown in figures 9, 10, 12 and 13, the stopper (9, 11) is disposed on the reverse surface of the magnetic circuit for restricting the bending of the sheet metal constituting

the terminal (10) to be within the reversibility limit value of the metallic material as claimed (also see page 2, lines 1-4 in the specification).

The admitted prior art does not specifically teach that the stopper (9, 11) is bonded with an adhesive to the reverse surface of the magnetic circuit as claimed.

However, providing an adhesive for bonding the parts in an electro-acoustic transducer is known in the art.

Since the admitted prior art does show the stopper (9, 11) that is adhered firmly and/or formed integrally on the reverse surface of the magnetic circuit; it therefore would have been obvious to one skilled in the art to provide an adhesive to the electro-acoustic transducer of the admitted prior art for an easy assembly and securely attaching the stopper (9, 11) to the reverse surface of the magnetic circuit.

In addition to claim 9, the admitted prior art shows an electronic apparatus (figures 11-12) that contains an electro-acoustic transducer as claimed.

Allowable Subject Matter

3. Claims 5-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 1-9 are have been considered but are moot 4. in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUYEN D. LE whose telephone number is (571) 272-7502. The examiner can normally be reached on 9:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, SINH TRAN can be reached on (571) 272-7564. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
